6P SERIES

6P SERIES

The best-selling range of petrol woodchippers across the UK and Europe for a reason. The Först 6P Petrol woodchipper range is renowned for fast, aggressive performance, outstanding fuel economy, robust build quality and simplicity of maintenance.

FÖRSTGRIP FEED ROLLER SYSTEM

Unmatched crushing power from 2 x horizontal, adjustable speed feed rollers which climb on an 'arc' over the timber. Independently powered rollers with 2 x heavy duty tensioning springs and a wide hopper right down to the mouth for easy processing of brush.

AUTOINTELLIGENCE

Very simple yet intelligent electrical control system taking care of all the electrical functions. Touch button, water and vibration proof controls located either side of the hopper giving one button for feed, one for reverse and the feed roller stop function on the stop bar and stop controls located on top of the hopper.

FÖRST FLYWHEEL SYSTEM

2 x 200mm long blades mounted on a heavy, 'open top' flywheel with large gusseted draught paddles ensure that material is ejected with speed and aggression leaving nowhere for material to stick or block. The system also produces an excellent quality, consistent woodchip.

EASY MAINTENANCE

Central greasing bank, easy access to blades and anvil by loosening 3 x bolts and quick access to the engine for servicing by unlatching 2 x catches. This is a quick and easy machine to maintain.

ROBUST CONSTRUCTION

Robust fabrications with strengthening supports and gussets in areas which take the most abuse, the 6P machines are built for the job despite the 750kg weight limit for the wheeled machines.

37HP EFI PETROL ENGINE

Outstanding engine producing consistent reliable performance and producing 37HP for a fast and aggressive chipping performance. Stage 5 emission compliant and with EFI technology for excellent fuel economy, this machine is only marginally less efficient than a diesel equivalent. Impressive!

ST6P

The Först ST6P is the fastest, most aggressive and most robust machine in its class making it the best-selling 6" capacity petrol woodchipper in the UK and Europe.

At the heart of the machine is the industry renowned FörstGrip feed roller system and Först flywheel system giving this machine unmatched performance in processing all types of material from wet, green conifer to hard, gnarly apple.

The ST6P hosts the powerful and highly efficient Vanguard 37HP V-Twin petrol engine, a perfect match for the machine capacity making it a rapid fire yet extremely fuel efficient thanks to the electronic fuel injection (EFI) technology.

With focus on quality and longevity, the ST6P uses the same chipping chamber, flywheel, feed roller system and hopper as its big brother, the ST6D, but has robust GRP panels, a shorter chassis and the much lighter petrol engine to bring it under the 750KG weight threshold for drivers without the B+E drivers licence.

ST6P SPECIFICATIONS

WEIGHT	745 KG
WIDTH	1335 MM
LENGTH	3350 MM
HEIGHT (WITH CHUTE)	2280 MM
BRAKES	FULLY BRAKED CHASSIS & HANDBRAKE

ROBUST RUNNING GEAR

Heavy duty locking hitch with robust jockey wheel and axle. A braked chassis and handbrake as standard.

30 LITRE CLEAR FUEL TANK

Plenty of fuel for a full days chipping with an easy fill clear fuel tank.

The Först TT6 is the most versatile product in the Först range yet. Fast, aggressive, robust and incredibly compact and user friendly thanks to its 360 turntable, the TT6 is the ultimate machine for the contractor and arborist working in urban areas and weighs in at less than 750kg.

The TT6 is a true 6" x 8" capacity machine. It hosts the exceptional FörstGrip feed roller system and the Först 'open top' flywheel system, well known in the industry for delivering a fast and aggressive performance. The machine will handle all types of material equally well, from dense, wet material to awkward limbs and forks.

Powered by the outstanding 37HP Vanguard EFI, V Twin Petrol engine, the TT6 offers a fast and punchy performance. The engine complies with the stage 5 emissions regulations and delivers exceptional fuel economy.

Sitting on a compact yet robust chassis, and a heavy duty slew ring, the TT6 is the most compact machine in its class with an overall length of just 2250mm when turned at the 90° position.

TT6 SPECIFICATIONS

WEIGHT	745 KG
WIDTH	1492 MM
LENGTH	2772 MM
LENGTH (HOPPER AT 90°)	2250 MM
HEIGHT (WITH CHUTE)	2350 MM
BRAKES	FULLY BRAKED CHASSIS & HANDBRAKE

ROBUST SLEW RING & CONSTRUCTION

Robust construction with plenty of steel where it is needed most, the TT6 has an incredibly compact yet heavy-duty chassis and slew ring.

360° TURNTABLE

The feature which makes the TT6 a 'game changer'. 360 turntable allows you to turn the machine to the position of your choice to make feeding the machine on the road side safer and much more convenient.

AMAZINGLY COMPACT

Designed with urban tree work in mind, the TT6 is the most compact machine in its class. In the 90 degree position the machine is a staggering 2250mm long and only 2772mm long in the transport position.

TR6P

Another fast and aggressive Förest product, the TR6P is the exact same machine as the TR6D but uses the fast and powerful 37HP petrol, Vanguard V-Twin engine.

Nimble and agile, the TR6P will get in tight spots and deliver a fast and aggressive performance on site, thanks to the FörestGrip feed rollers and Förest Flywheel system coupled with the punchy petrol engine.

The TR6P is a very economical way to acquire a tracked chipper thanks to the price of the petrol engine compared to a diesel unit. The Vanguard engine comes with a 3-year warranty and offers amazing fuel economy.

HIGH SPEED TRACKING

'Piggyback' hydraulic pumps give high speed tracking with our compromising torque.

VARIABLE TRACKS

Variable width tracks as standard allow you to reduce the width to get through tight spots and expand the tracks for stability on rough terrain.

TR6P SPECIFICATIONS

WEIGHT	1200 KG
WIDTH (TRACKS IN/OUT)	800MM / 1150MM
LENGTH	2695 MM
HEIGHT (WITH CHUTE)	2395 MM
