

OPTIONAL FEATURES

ELEVATE

MORE THAN TELEMATICS

ELEVATE provides the actionable insights to make your business more efficient. Skyjack has worked with customers to identify and provide the most important data points that solve day-to-day pain points in rental service and management.

Beyond hours and location provided by basic telematics systems, ELEVATE delivers machine specific alerts and analysis which can dramatically reduce unnecessary service calls and trips to site for diagnostic work.

These Skyjack specific features deliver immediate impact for your business:

- Ready to operate
- ELEVATE Live
- Full data access

ELEVATE LIVE

It's operators and site supervisors that determine how your machine is treated. These roles need data to make the right decisions to get the work done, and to take care of your machines.

To the operator.
At the machine.
When it's needed.

Strictly relevant data like battery charging guide, battery life remaining, and active fault codes are provided to operators at the machine instantly via a QR code scan.

Machine documentation like emergency lowering procedure, visual pre-check guide, familiarization videos are all there with the tap of a finger. No downloading an app. No username or password required.

Standard on all machines ELEVATE Live provides serial specific resources through a simple QR code including:

- Operator manuals
- Familiarization videos: brief visual overviews of the machine
- Serialised machine information, including parts manuals and specification sheets
- Emergency lowering procedures
- Pre-use checklist: visual guides for pre-use inspection
- Quickstart guide

*Only available with ELEVATE telematics and not as a standalone option.

SJ3013 micro

DC SCISSOR LIFT

SKYJACK
simply reliable

SIMPLY RELIABLE

Skyjack's focus on designing machines for the rental industry contributes to leading life cycle value achieved through:

- Competitive acquisition costs
- Consistently high residual values
- A reputation for robustness and reliability

MIGHTY MICRO MEANS BUSINESS

Skyjack's new SJ3013 micro represents a significant new presence in the low level access arena. Ideal for easy accessibility into tight spaces, quiet and swift electric drive and AGM batteries the SJ3013 micro combines low cost of ownership with Skyjack's renowned product support, all at a price that means business.

| | | | |
|--------------------|-------------------|--------------|------------------|
| | | | |
| 20' 5" (6.23 m) | 14' 5" (4.4 m) | 20" (0.51 m) | 30" (0.76 m) |
| | | | |
| 1.9 mph (3.0 km/h) | 1808 lbs (820 kg) | 25% | 529 lbs (240 kg) |

COMPACT AND LIGHTWEIGHT

Designed to fit into most elevators and to work in environments where space is at a premium while at the same time providing a substantial work area.

- 2-Person platform capacity
- Passes through a standard door rails up
- Up-and-over capability
- Single point emergency lowering
- Low floor loading
- Lifting lugs and tie-downs locating on all 4 corners
- Hydraulically operated pothole protection system
- Forklift pockets located at rear of machine

ELECTRIC DRIVE PERFORMANCE

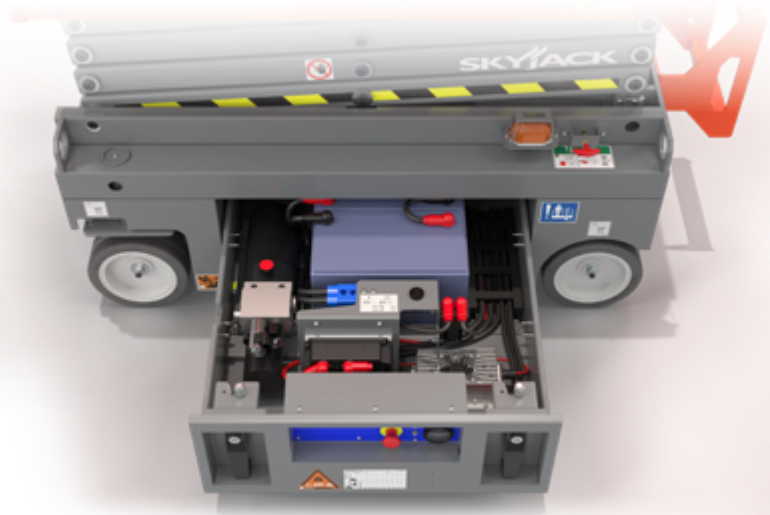

Variable speed rear wheel electric drive provides exceptional duty cycles reinforced by maintenance-free AGM batteries as standard.

- Drivable at full height
- 25% gradeability and consistent torque
- 90 degree steering provides excellent job-site maneuverability
- Fully proportional drive and lift controls
- Minimal maintenance on wheel motors

EASE OF MAINTENANCE

A single steel lockable slide out tray provides easy access to service components in one location.

- Tracked cable/ hose system that rolls up underneath
- Two x 12V AGM batteries
- 350A Charger
- Quick attach power disconnect cable

SIMPLE ROBUST CONTROLS

Removable high strength steel control box.

- Integrated shroud
- Fully proportional joystick safety enable trigger
- Battery level gauge, horn, and emergency stop
- Membrane type switches

LARGER WORK AREA

Sturdy all steel design incorporates a foot pedal operated roll-out extension deck, with multiple locking positions increases work area and provides up-and-over capability.

- Permanent anti-slip checker plate floors
- Folding rail system, to reduce stowed height for transportation and to pass through standard doorways
- Standard self-closing half height gate provides easy entry into the platform
- Multiple lanyard attachment points
- Foot pedal release extension deck that allows for quick and easy up-and-over access
- Power to the platform provides a power source for tools and eliminates hanging cords

WIND RATED DESIGN

Designed with both indoor and outdoor use in mind, the SJ3013 micro is wind rated for one person up to 10ft. This increases the application possibilities and increases rate of return.

† Capacities, and machine weights may differ when options are added.
Preliminary specifications at time of printing. Consult your local area sales representative for details.
